

TOO MANY ON RETIRED LIST

Congressman Prince Says Officers of Army Are Given Uneared Money.

SHIP SUBSIDY UP ALSO KENTUCKIAN SAYS WE HAVE FINEST MERCHANT MARINE.

Washington, Feb. 22.—The house today refused to adjourn in celebration of Washington's birthday, and its members participated in a general day of debate on the army appropriation bill.

Mr. Prince of Illinois was the first speaker. He mentioned the fact that there were half a million persons under the direct control of the president—300,000 under the civil service, 60,000 in the army, 45,000 in the navy and marine corps, 70,000 postmasters and fully 25,000 not classified.

Referring to the question of the retirement of officers and the abolition of the grade of lieutenant general, Mr. Prince criticized the system by which it was possible to have a large number of officers on the retired list. With an army of 60,000 he said there were now 300 officers on the retired list, drawing an average of \$3,000 a year or a total of \$2,700,000.

There had been sixty-two brigadier generals who served for one day in that rank and were then retired, from January 1, 1902, to January 1, 1905. "And," he continued, "I am inclined to think the moving picture is going on today at the same rate."

"One day's service was giving unearned money to these officers," continued Mr. Prince. "All officers have to do is to mark time, knowing they will be retired at a higher rank."

"The gentleman it seems to me, has shown a very outrageous abuse of power and privilege on the part of some one," said Mr. Lawrence of Massachusetts. "Who is it that makes the promotions?" he asked.

President Names the Men.

"The president has the right and is the only one who has the right to make promotions and the senate confirms them," replied Mr. Prince. The ship subsidy was discussed for an hour by Mr. Gilbert of Kentucky, who took the position that ships could be built as cheaply in this country as abroad.

Mr. Gilbert asserted that the United States possessed the finest merchant marine fleet of any nation. In this he included the 138 ships of the Morgan & Co. ownership, sailed under the British and German flags. Asked to explain this, he quoted English and German laws to the effect that shipping was not entitled to the protection of these countries unless completely controlled by their subjects. Should trouble come, the Morgan ships would have to be protected by the American flag.

Such bills as the ship subsidy bill, he said, were always drawn in the interest of the shipping trust or the millionaires.

When Mr. Grosvenor of Ohio took the floor he was greeted by prolonged applause from both sides of the house, it being understood as an expression of regret at Mr. Grosvenor's failure of re-nomination. "I hope this does not come out of my time," he snarled, remarking Mr. Grosvenor. He then proceeded to pay his respects to Mr. Gilbert, who had just concluded a speech on the ship subsidy.

"There never has been compressed into an hour so many erroneous statements as were made by the gentleman from Kentucky," declared Mr. Grosvenor, who announced that at some time later he would reply in detail.

Mr. Grosvenor concluded his speech with a vigorous protest against the provision of the army bill abolishing the grade of lieutenant general. He declared he should make a point of voting against the measure for the reason that it would shut out General Corbin, whose services as a soldier he reviewed at some length. It would also bar General MacArthur.

The house adjourned at 5:05 o'clock, having finished the general debate on the army bill.

A DIFFERENCE IN LUNGS.

In the Edinburgh University three human lungs lie side by side. One is of an Eskimo and is snow white. In life, this would be ruddy with rich blood. Another is that of a coal-miner and is black. The other is of a town dweller and is a dirty slate gray, as are the lungs of most city residents. That's why consumption thrives in cities.

One reason why Scott's Emulsion does so much to keep down consumption is because it helps to keep the lungs clean and supplies them with rich, red blood. It makes the lungs germ-resisting. If the body is run down and health is at a low ebb Scott's Emulsion will build it up quickly and permanently.

MOVES UP A NOTCH. Davis County Exceeds Valuation Required for Eighth Class Rating.

Farmington, Feb. 22.—With the year 1905 Davis county passes from a ninth class to an eighth class county, its property valuation having increased to such an extent that it now has \$33,114 in excess of the valuation required for an eighth class rating. The \$400,000 valuation was passed in 1905, the total assessed valuation for last year being \$3,333,114. At the present rate of increase only a few years will be required to raise the county above the \$5,000,000 mark, and thus make another class of county. The probable effect on sales of this change is being commented upon by the county's official family, and as the commissioners are to fix salaries for the ensuing two years next July, their action will be awaited with much interest. The present moderate salary schedule has come down to the Republican administration as a heritage from the Democratic board.

COUNCIL PROCEEDINGS. Park City Solons Meet in Second Monthly Meeting.

Park City, Feb. 22.—The second regular meeting of the council for the month of February was held in the city hall last evening, and the following business disposed of: Mayor Welch called the council to order at 8 o'clock, and the roll call found all of the city solons present.

Under the head of petitions Sam H. Raddon, manager of the Park City National baseball team, asked the council for permission to use the ball park during the summer months, and after some discussion it was decided that it was a little early to consider such a request, and the petition was tabled.

The committee on streets, alleys and bridges, which had reported on the petition of Heat & Power company had offered three dollars at \$50 per lamp per month if they would grant the light company a franchise to use the city streets. This was refused by the council, however, and the offer was not considered.

Under the head of new business Gibson asked that the city hall be cleaned and repaired, for the place is in a very unsafe and unhealthy condition and should be repaired at once. Rasband moved that the committee on city property investigate the condition of the hall at the next meeting. Motion carried.

Councilman Rasband asked the marshal if the policemen of the Lincoln school, members of the freshmen class, entertained the other classes of the High school at a George Washington program given today in the evening. The answer was well rendered and well received.

CONSTIPATION AND ITS CAUSES. A Well-Known Remedy.

Constipation is one of man's worst enemies, and half the modern ills we suffer are a result thereof. Nature meant that the bowels should be kept free and open—that we should have a free movement at least once a day. Of course, we ourselves are to a large extent responsible for our troubles by failure to observe Nature's laws. Our habits are irregular, we eat improper food with undue haste, and when we find our bowels do not move, we resort to powerful drugs and medicines, which are so drastic in their action that, although they may purge at first, they damage the tender lining of the stomach and bowels so as to leave a worse condition than before. And why take such injurious and expensive drugs when we can obtain from any drugstore, much cheaper, a bottle of Nature's own remedy—HUNYADI János'—bottled at the springs in Hungary; in use nearly half a century. One dose, ½ a tumblerful, drunk on arising in the morning (slightly warmed for best results) will bring within an hour a refreshing movement—gentle, natural, and thorough—without any griping or purging or other bad effects. A whole bottle costs but 50 cents. Keep one always on hand. At all drugstores.
